Tiny Giant
Directing-Duo

Tiny Giant is a director duo specialized in handmade animation. We are always looking for exciting ways to combine traditional and n ew techniques and have a great affinity for the art of stop motion animation.

In our work, film, photography and animation become one. Objects and characters are brought to life and filmed with great sensitivity, while always keeping the focus on good concepts.

With an artistic approach and a clear visual language, stories are created that are both entertaining and can convey complex content.

We like to move on the border between reality and fiction. What emerges is complex, surprisingly simple and unconventional.
