

Introduction

I am multidisciplinary creative with work experience in the fields of art direction, concept creation, set design and graphic design. I wish to create art, in any form, that is simple yet thought-provoking and, due to my sensitivity with materiality and colors, something beautiful to look at. Because no matter the product, people will always be more interested in stories not services. I draw my inspiration from the art of nature and the delicacy of fashion design and pop culture.
